How do we understand the concept “Curriculum”?

- Knowledge
- Educational experiences
- Development aspects
- Education beyond the school walls
- Ethics, values,...

A Hidden Curriculum

“Expresses and represents attitudes, knowledge, and behaviors, which are conveyed or communicated without aware intent.”

-C D Jerald -2006

“A hidden curriculum refers to everything in school from teacher-student interactions to the structure of classroom and general pattern of an educational organization which might be called a small model of social values system.”

- Vallance - 1991

A hidden curriculum must be skillfully applied...

- Raise generations to be:
 - ✓ Up to the challenges of a postmodern world.
 - ✓ Capable of becoming effective members in their societies
 - ✓ Have the skills to keep pace with the rapid changes of their world.

A Catholic School

“Teaching for Today and Tomorrow”

“Think through once again the works of mercy... the work of the Father.”

- Pope Francis
2016

Hidden Curriculum Strategy

- Be the main source of educational development.
- Kindle a significant change and development in community
- Invest in the surrounding resources without ignoring the necessity for the desire and enthusiasm to make a change
- Prepare the required expertise among our administrative and educational body.
- Have a target to educate the youth to become effective members in society
- Raise them to become more open and accepting to others
- Finally have them ready to face the challenges of a rapidly changing world.

We simply...

- Encourage Talents.
- Have students participate in Co-curricular projects.
- Have music and art as part of our weekly programme.
- Connect with our society through voluntary work.
